

XVII EBMWG 2025

International Bone Marrow Course and Workshop:
Impact of morphologic, immunophenotypic and
molecular features on the classification of bone
marrow myeloid and lymphoid neoplasms

SALZBURG, April 10th-12th

TOPICS:

- Histiocytic and dendritic cell neoplasms
- Myeloid neoplasms with unusual patterns of disease progression other than acute leukemia
- B-cell lymphoproliferations in the bone marrow without defining molecular features

Preliminary organizing committee

Dr. Karl Sotlar

Dr. Leonie Saft

Dr. Alexandar Tzankov
